* Excluding 2,047,100 shares held by Insiders

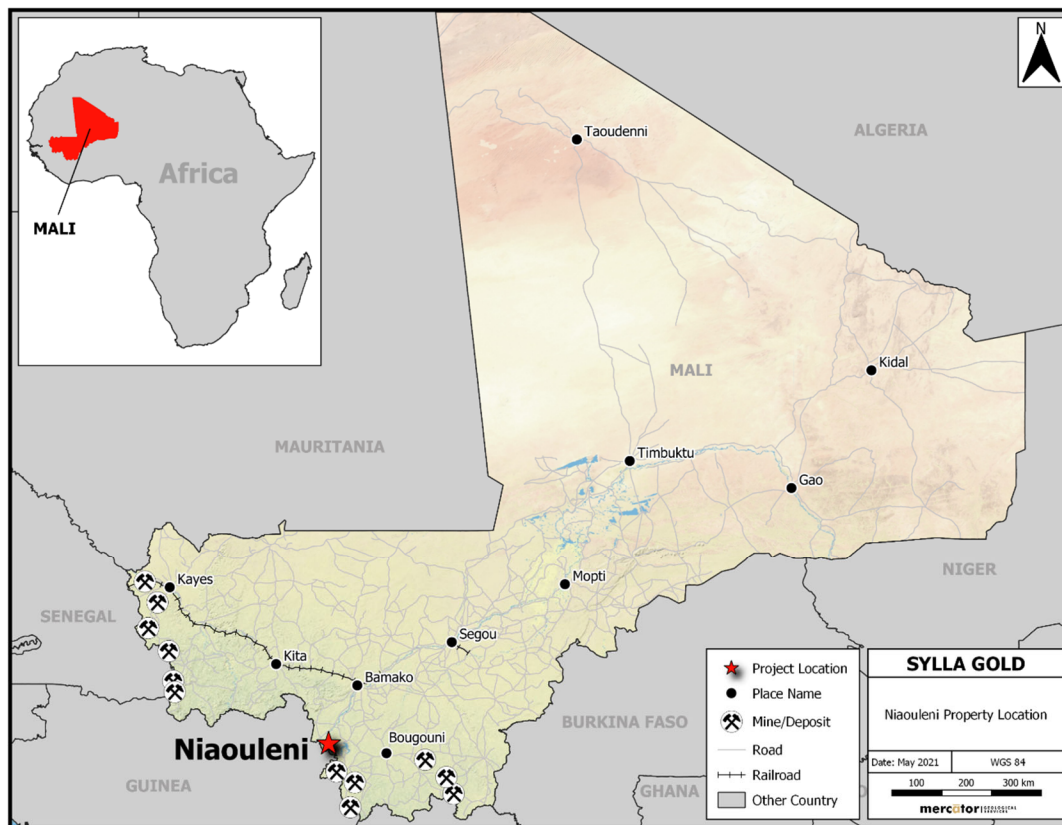

Regan Isenor, President and CEO of Sylla Gold commented, “On behalf of the Company I’d like to welcome Darrin Campbell to the Board. Darrin brings a strong financial background with a particular track record of mineral exploration projects in Africa.

With the 100% shareholder support for the Niaouléni Transaction, the Company is excited to complete the extensive data compilation of the property and quickly move into a drilling campaign focusing on testing the known zones of high-grade mineralization established in past work.

I would like to thank the shareholders for the confidence expressed for the Directors and Management of Sylla Gold Corp.”

Niaouleni Project

The Niaouleni Project is 9,400 hectares in size and accessible by paved highway and includes extensive artisanal mining activity within the interpreted extensions of gold bearing structures. Past exploration at Niaouleni includes extensive reverse circulation (RC) and diamond drilling, which have identified several structural gold-bearing zones that appear to extend from the adjacent Kobada gold deposit. Historical exploration and drilling results are currently being compiled into a digital database and will be interpreted for the purposes of designing a drilling program to further test these structural gold-bearing zones and possibly extend them further.
